Hi Dave,

Sherry said that you had spoken to her about the site.

I should be able to send the analytical data soon. I have location information from Bristol and 2 results so far for the well samples. I will send the complete set when I get the other two well results, and then the soils and air samples when they come in. We were not able to take air samples at the hotel. The owner was out of state and he had no one to open for us. We may collect them at a later date. So we only have one indoor, one outdoor, and one sub-slab sample in the set.

The Kozaks want the results sent to them by fax, but as you know there will be many pages. I will call them to see if they would prefer for me to send them by mail. Either way is OK with us.

Also, regarding talking to the folks at Bristol- I am OK with you speaking to them, but I would prefer to be included in any conversation. They cannot charge anything additional to the project, as they have a fixed-price task order. So I can't ask them to do any additional work outside what is approved in the task order. That is just the nature of the contract that they have with EPA, and the contract period ends 4/18, after which they will no longer perform any work until they have a new task order.

I look forward to getting together with all parties to talk about the next steps for the project.

Regards,

Bob
